~~A~~  
2/3/20

Field - of - Study an area of Academic Concentration, a discipline; A Field Study is a general method for collecting data about users, user needs, and product requirements that involves observation and interviewing. Data are collected about task flows, inefficiencies, and the organizational and physical environments of users.

It is very important as it helps to gather required information, So as the problems under investigation is studied in depth as per the predefined objectives, Field Studies enable the investigation to comprehend the situation and processes in totality and at the place of their occurrence.
