~~A~~  
21/3/20

## Introduction :-

On the 6<sup>th</sup> February 2020, along with my course mates, we went for a field visit which was organized by our philosophy department of Kumar Bhaskar Varma Sanskrit and Ancient Studies University, Nalbari. We visited Manas National Park.

Manas was declared as a National Park in 1990. The name 'Manas' is derived from the Hindu deity, the snake goddess 'Manasa' and is also shared with the Manas river that transverses through the park. Total area of the park is about 500 km<sup>2</sup>. The Manas River flows through the west of the park and is the main river also serves as an international border dividing India and Bhutan. It is a major tributary of Brahmaputra River and splits into two separate rivers, the Beki and Bholkaduba as it reaches the plains. Five other smaller rivers also flow through the National Park which lies on a wide low-lying alluvial terrace of
